

Access Control for Healthcare

A Healthy Dose of Security

Physical security breaches are the second highest cause of security violations in the healthcare industry. Genea Security helps healthcare providers plan, automate and strengthen their physical security, keeping patients and staff safe.

Healthcare Facilities Trust Genea

Scalable, Cloud-Based Access Control Security

Healthcare professionals help patients live long, healthy lives. Your access control should, too.

Non-proprietary Hardware

Non-proprietary hardware means no more expensive ripping and replacing. Genea works with mercury-based hardware, allowing you to keep most or all your hardware, even if you want to change software.

Total Oversight from One Dashboard

Within a single dashboard, view each hardware status and access event in every facility, worldwide.

Choose Your Credentials

As mobile and biometrics become more popular, Genea will help facilitate your transition into the future. Choose from key cards, smart cards, key fobs, mobile and more.

Integrate Your Access Control Security

Future-proof Software

With dozens of API integrations, healthcare facilities can pair the software they use every day with the access control software they deserve.

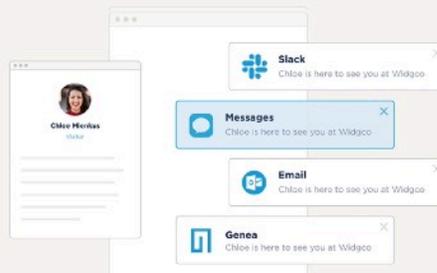

Video Management Integrations

Genea Security integrates with various video management systems. When an access alert occurs, a video clip gets logged in the access control platform. No need to toggle between both applications.

Identity Management System Integrations

Automate the adding and removing of users and change employee access privileges by integrating with your identity management software.

FEATURES THAT PROTECT
Plan for the Unknown

-  **Emergency Door Plans**
 Choose the doors that lock or unlock during an emergency. Then, automate your plan with a single click.
-  **Visitor Access Plans**
 Keep tabs on where and when a visitor enters your facility. With Genea Security, admins can categorize and assign mobile badges by role.
-  **Pre-arrival Health Questionnaires**
 Every year an estimated 648,000 people in the United States develop infections while in healthcare facilities. Pre-screen your visitors and staff with custom health questionnaires.
-  **Automated User Removal**
 Purge inactive credentials from your system. Create "use-it-or-lose-it" rules to automatically deactivate dormant credentials.

Visitor Management for Healthcare Facilities

According to the latest data from the American Hospital Association, there were over 36 million admissions to healthcare facilities. Genea Visitor Management can send prearrival health questionnaires, documents to sign and more.
